Solar Fabrik Double-Glass Bifacial

HIGH PERFORMANCE FROM EACH SIDE

The new Solar Fabrik Double Glass Bifacial, thanks to the latest cellular technology, achieves up to 30% higher efficiency per installed kWp. The high-performance duo cells, with their active rear surface, convert solar radiation from all directions into electricity. Also, the use of glass on the front and back, makes the PV frame extremely resistant to time and mechanical loads. It is especially suitable for free surfaces and flat roofs. The brighter the background, the more light is reflected in the PV panel, further increasing electricity generation.
